

# Bridge Access Program for COVID-19 Vaccines and Treatments

**Under the management and oversight of the CDC, the Bridge Access Program will continue to ensure access to COVID-19 vaccines and treatments after commercialization of these products in Fall 2023 through December 2024.**

## Who's eligible?

The 25-30 million **adults without insurance**, in addition to those whose **insurance does not provide cost-free coverage** for COVID-19 vaccines and treatments.

## Is this program permanent?

This program serves as a **temporary bridge** to the permanent and comprehensive **Vaccines for Adults Program** proposed in the FY23 and FY24 [President's Budgets](#).

## Where can someone get a vaccine?

### At a local health provider

CDC will use **existing partnerships** with state and local health departments (LHDs) to quickly distribute COVID-19 vaccines through providers in their networks.

CDC will **manage the purchase and distribution of COVID-19 vaccines** for state and LHDs, along with providing oversight and technical assistance.

### At a local health center

**Federally qualified health centers (FQHCs)** will partner with LHDs and state immunization programs to ensure access for the many uninsured adults already served by these providers.

HRSA will **provide funding and support** to its network of FQHCs to ensure outreach and vaccine delivery in the communities they serve.

### At a nearby pharmacy location

CDC will work **with pharmacies** to ensure uninsured adults can continue to access free COVID-19 vaccinations and treatments at thousands of locations nationwide.

Pharmacy chains will use their extensive footprints and community partnerships to reach **adults who are uninsured and underserved**.
